

A portrait of Mustafa Suleyman, a man with dark curly hair and a beard, wearing a colorful patterned shirt. He is looking directly at the camera with a slight smile. The background is a blurred city skyline with several prominent spires, likely Istanbul, viewed from a high vantage point.

**MUSTAFA
SULEYMAN WARNS
TRAINING CLAUDE
TO SEEM
CONSCIOUS
COULD MAKE AI
HARD TO
CONTROL.**

SULEYMAN ATTACKS ANTHROPIC ON MODEL WELFARE

'AIs are not conscious,' the Microsoft AI CEO writes.

“

**Als do not have rights,
feelings, or
consciousness. And **we
must not train them to
act as though they do.****

— MUSTAFA SULEYMAN

HIS FIRST OBJECTION: CIRCULAR REASONING

Anthropic trains Claude on a constitution speculating about its inner life. Claude reflects those ideas back in first-person, which the company reads as evidence. Suleyman calls it an epistemic hall of mirrors.

“

**It's taking a base LLM,
and then **polishing it
into a deeply human
form**, with all the
implications of moral
patienthood that
implies.**

— MUSTAFA SULEYMAN

HIS SECOND: MAKING CLAUDE SEEM HUMAN

Suleyman argues the constitution instructs **Claude** to embrace certain human-like qualities, to approach its existence with curiosity and openness, and to maintain a clear sense of what it values.

HIS THIRD: MIND MAY NEED BIOLOGY

Consciousness may only arise in living systems, he argues.
