

**REP. JOSH
GOTTHEIMER
WANTS THE
NSA TO TEST AI
MODELS
BEFORE
RELEASE.**

TWO BIPARTISAN AI BILLS UNVEILED FRIDAY

On September 18, Rep. Josh Gottheimer (NJ-5) unveiled **two bipartisan AI security bills** at Fairleigh Dickinson University in Teaneck.

NO MANDATORY PRE- DEPLOYMENT AI TESTING

Right now, there are **no
mandatory
requirements for pre-
deployment testing of
frontier AI models.**

— REP. JOSH GOTTHEIMER (NJ-5)

THE NSA WOULD GET **30 DAYS** TO VET A MODEL

30 days

Plus one 30-day extension if needed

THE FIREWALL ACT WOULD EXTEND THAT BAN

DeepSeek is already blocked from federal devices. Gottheimer named Kimi K3 and Qwen as Chinese open-weight models the bill would also keep off federal systems.

HE'S ALSO PRESSING THE CYBER DIRECTOR

Gottheimer said he's writing to **Sean Cairncross**, the President's Cyber Director, asking whether the Administration's new **AI cybersecurity clearinghouse** is built for today's threats.

LEADERSHIP REFUSED A FLOOR VOTE

Gottheimer said Republican leadership sent Congress home without acting on any of these critical pieces of legislation.

**FOLLOW HELIOS
TO KEEP UP WITH
HOW CONGRESS IS
MOVING ON AI
REGULATION.**
